

SUPERSTORE SALES ANALYSIS AND BUSINESS INSIGHTS REPORT

1. Introduction

This project focuses on analysing Superstore sales data using Excel, SQL, and Power BI. The objective of the project is to identify business insights, sales trends, profitable categories, and regional performance through data visualisation and SQL analysis.

2. Key Business Insights

Total Sales Performance

The overall sales generated from the Superstore dataset were approximately 2.30 million, indicating strong business performance during the analysed period.

Profit Analysis

The business generated a total profit of approximately 286.40K. Technology products contributed the highest share of profit among all categories.

Regional Performance

The West region recorded the highest sales compared to other regions. This indicates stronger customer demand and better business performance in Western states.

Category Analysis

The technology category generated the highest sales and profit, while Furniture showed comparatively lower profitability.

Product Performance

Canon ImageCLASS products and other technology-related products contributed significantly to total revenue generation.

Sales Trend Analysis

Sales performance showed continuous growth from 2014 to 2017, with peak sales observed during 2017.

Discount Impact

Higher discount percentages negatively affected profitability in certain product categories. Excessive discounting reduced average profit margins.

Recommendations

- Focus more on the Technology category products to maximise profit.
- Reduce excessive discount strategies to improve profitability.
- Improve sales strategies in low-performing regions.
- Increase marketing efforts for top-performing products.
- Maintain strong customer engagement to improve repeat purchases.

3. Conclusion

The project successfully demonstrated the use of data cleaning, SQL analysis, and Power BI dashboard visualisation to derive meaningful business insights. The dashboard provides an interactive platform for analysing sales, profit, regional performance, and customer trends effectively.
